Advantages of **DPMAdirektPro**

- **Fast, low-cost and easy transmission of documents**
For electronic transmission, the software checks your data for completeness and correctness. There is no need for subsequent corrections, which are often necessary when paper-based documents are filed. Consequently, we can conclude the procedure faster. In addition, electronic application helps to avoid format discontinuity.
- **Independent of commercial software systems**
The XML format used for electronic applications is based on an open standard. This guarantees independence from commercial software systems.
- **Communication with administration systems via an interface**
A file system interface simplifies working with **DPMAdirektPro**. Data transfer and data import can be automated. The documentation can be downloaded free of charge from the DPMA website.
- **Secure data transmission**
The use of encryption and signature methods ensures that the electronic transmission of the documents is faster and more secure than sending them conventionally by post or fax.
- **Prompt notification of receipt**
Directly after your documents have been transmitted to us, you will receive a notification of receipt and within a few minutes a filing confirmation.
- **Electronic service for the receipt of documents (optional)**
We offer an electronic document mailing service for patents, utility models and trade marks as an optional additional service.

Costs

The use of **DPMAdirektPro** is free of charge: The fees for electronic applications are lower than for conventional paper-based applications. However, costs may accrue for the signature card*. Please directly contact the respective supplier for information on costs.

* Information on suppliers of signature cards is available on our website at www.dpma.de (in German).

DPMAdirektPro

Online filing of IP applications

DPMAdirektPro – online filing of IP applications

DPMAdirektPro allows you to file legally effective IP applications online and to later submit electronic documents relating to IP applications online to the German Patent and Trade Mark Office (DPMA).

You will be prompted to fill in clear on-screen forms for submitting the data required for the requests. The data will automatically be converted into the data format required by the DPMA.

The necessary **DPMAdirektPro** software is available free of charge on our download page.

You can file the following documents:

- patent applications (German, European and PCT)
- utility model applications
- trade mark applications
- applications for international registration (of a mark) and subsequent designation to international registration
- design applications
- initiation of national phase entry of a PCT application for the grant of a patent or registration of a utility model
- oppositions in patent procedures
- appeals in patent and trade mark procedures
- applications for determination/declaration of invalidity of registered designs
- specification of purpose of use of SEPA mandates
- further requests or submissions relating to IP rights or IP applications (subsequent filing of documents/requests)

Of course, you can still also file paper-based applications. In addition, it is possible to register for the electronic receipt of documents service of the DPMA. Our letters will then no longer be sent by post but electronically using **DPMAdirektPro**.
